Project/Task Manager at General Dynamics Information Technology with 8 years of experience supporting U.S. Navy shipboard systems, technical operations, and defense contracting programs. Experienced in managing multimillion-dollar project portfolios, coordinating with government stakeholders, and overseeing the planning and execution of mission-critical system installations. Proven background in technical leadership, cross-functional coordination, quality assurance, and procedural compliance. Currently pursuing an M.S. in Computer Science at Old Dominion University, with an expected graduation in December 2026.

Professional Experience

General Dynamics Information Technology – Project/Task Manager
JUL2026-CURRENT

- Manages project portfolios with estimated annual budgets in the multi-millions
- Coordinates with government representatives in the planning and execution of several rapid, consecutive installations of critical systems on US Navy vessels
- Conducts briefings before installations for planning, after installations for reviews on milestones statuses, and if budgets remained within costs estimated
- Conducts semi-annual briefs at the program level for future program goals and reviews on past projects

Delphinus Engineering - Engineering Technician IV
FEB-AUG 2023

- Conducted pre-planning for shipboard installations, including drawing reviews, modifications, and ship walkthroughs in support of C5ISR
- Installed fiber optic and copper data systems in accordance with NAVSEA quality standards

ICETEK LLC - Team Lead
APR 2016-FEB 2023

- Installed, removed, repaired, and tested various power, data, and combat systems aboard multiple classes of Naval Vessels
- Performed various mid-level planning and work control and authorization roles
- Acted as on-site supervisor for installations, removals, and final inspections
- Led and coordinated West Coast teams, overseeing personnel, schedules, and quality compliance across multiple projects

United States Navy - Machinist Mate (Nuclear) Third Class, MMN3 (Honorably Discharged)
APR 2012-FEB 2016

- Operated machinery in Reactor Mechanical Division to produce electricity for ship's loads
- Extensive and continually high volumes of training in Nuclear Power Plant Operations
- Inspected and maintained valves, pumps, tanks, heat exchangers, and demineralizers
- Performed and assisted in maintenance of nuclear components and equipment
- Control and Disposal of Radioactive Materials
- Able to perform and think critically under high-stress environments

Technical Skills

- Java, Python, C++, HTML
- Fiber-Optic Systems
- Marine Electrical & Data Infrastructure
- Systems Installation & Testing

Professional Skills

- Leadership & Team Supervision
- Technical Planning & QA
- Critical Thinking
- Communication
- Time Management
- Procedural Compliance

Education

OLD DOMINION UNIVERSITY

- M.S. Computer Science – Expected December 2026
- B.S. Computer Science – December 2025

NAVAL NUCLEAR POWER TRAINING

- Prototype / Nuclear Power Training Unit, NPTU Ballston Spa, NY – 2013
- Nuclear Power School / Naval Nuclear Power Training Command, Goose Creek, SC – 2012
- Nuclear Field "A" School – Machinist Mate / Naval Nuclear Power Training Command, Goose Creek, SC – 2012

STATE UNIVERSITY OF NEW YORK AT BUFFALO

- B.S. Electrical Engineering – 2011

Certifications

- Fiber Optics Supervisor / QA Inspector (Ksaria)
- Contractor Technical Work Document Training (Newport News Shipbuilding (HII))
- Fiber Optics Termination & QA (Kitco Fiber Optics)
- Multi-Pin/Copper Connector (ICETEK)
- Cableway Handling (ICETEK)
- OSHA-10HR
